Cut and Move Trailer

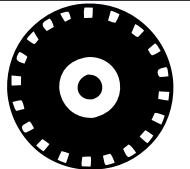

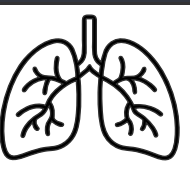

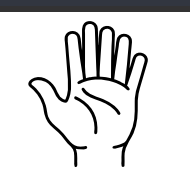

The Select Cut and Move trailer is a robotic system for tile and block cutting mounted in a specially designed trailer.

This is an innovative solution that combines fast and precise automatic cutting whilst ensuring a safe working environment with low dust and noise levels and increases in productivity when compared to traditional construction methods. With its compact and mobile design and dual electric and generator power options making it easy to set up even in the most challenging site environments.

Dimensions

| | |
|--------|--|
| Length | 442 cms |
| Width | 210 cms |
| Height | 244 cms |
| Weight | 1.850 kgs without water 2,000 - 2500kg with water |

Benefits

| | | | | | |
|---|---|---|---|---|--|
| > |  | Mobile and compact design | > |  | Fast and precise cutting |
| > |  | Reduced noise - Reduction from 110 to <80dB | > |  | Low dust as the dust is contained within the cabinet |
