

FreeFalcon Mobile Fall Protection

From experience comes innovation - Safety Redesigned

FreeFalcon - Mobile Fall Protection System

The mobility of the FreeFalcon means there is no need for initial planning before it is implemented on site and there is no need for sufficient curing of concrete to enable safe operation of the system, therefore saving time & costs of projects.

Maximum Safety

With Overhead Protection

Unrestricted Freedom of Movement

360° Fully Rotatable with a Working Radius of up to 10m.

Ready For Immediate Use

Can be Lifted Onto a Site Using its 4 Load Attachment Points; does not require anchoring, therefore no structural pre-planning is required.

Fully Mobile

Easily Moved Using a Standard Pallet Truck
